Dear Sirs

I read recently that the American dollar
of the year 1884 is now worth 200 B.

Is this correct? as I have one now in my
possession, also two American dollars
of the year 1882, and one of the year
1883, are these valuable too?

Enclosed please find stamped
envelope for your reply

Yours sincerely

Dear Madam:

The American dollar of 1884 that is rare is the trade dollar having a seated figure rather than a head. You presumably have the dollar with the head on it. None of these dollars with the head have any special premium.

Yours very truly,
